Summary

Enthusiastic final-year Engineering student with advanced Computer Science experience and a strong problem-solving track record. Gained practical knowledge through challenging coursework and complex projects. Skilled at simplifying large, complex systems and thriving in team settings, even under high pressure. Committed to leveraging my technical skills and creative thinking to contribute to pioneering engineering initiatives. Eager to embrace new challenges and excel within the industry.

Education

Vemana Institute of Technology, Bengaluru <i>B.E in Computer Science & Engineering</i>	December 2021 - Present
St. Francis Composite PU College, Bengaluru <i>Degree in Higher Secondary(PUE)</i>	May 2019 - June 2021 <i>Percentage: 91.3</i>
St. Joseph's Indian High School, Bengaluru <i>Degree in Secondary(KSEEB)</i>	May 2014 - March 2019 <i>Percentage: 83.2</i>

Technical Skills

Languages: C, C++, Java, Python
Frontend: HTML, CSS, Bootstrap
Database: SQL
Developer Tools: VS Code, PyCharm/IDLE, Git, GitHub
Data Visualization & BI Tools: Tableau, Power BI
Soft Skills: Problem Solving, Self-learning, Presentation, Adaptability

Projects

Inventory Management System	February 2024 - April 2024
- Developed an open-source inventory management system using PHP, HTML, JavaScript, CSS, XAMPP, and VS Code. - Implemented a user-friendly interface for easy navigation and efficient management of inventory, orders, and products. - Optimized database queries and data storage mechanisms to ensure high performance and scalability. - Conducted thorough testing and debugging to ensure the system's reliability and stability in real-world usage scenarios.	
Face Detection Using OpenCV	July 2023 - August 2023
- Got selected as one of the top 5 out of 18 students who presented their project ideas. - Developed a face recognition-based attendance system utilizing Python and OpenCV libraries. - Implemented real-time face detection and recognition capabilities using computer vision algorithms.	
75 Student Satellite Mission	March 2023 - Present
- Played a key role in planning and executing a student satellite mission, contributing to mission objectives and technical requirements. - Led the development and integration of multiple satellite payloads, including data collection, communication, and telemetry systems. - Collaborated closely with team members from diverse backgrounds to ensure seamless integration and operation of satellite subsystems. - Conducted extensive testing and validation of satellite components and systems to meet mission reliability and performance criteria.	

Certificates

- **Foundation of Artificial Intelligence, Infosys SpringBoard** **March 2024**
Certificate Of Achievement
- **Masterclass: Ground Control Station Operations, 75 Students Satellites Mission** **February 2024**
Certificate of Training by ITCA
- **Generative AI and Data Analytics using Tableau, Intern** **October 2023**
Certificate Of Internship by Unifirst Robotics
- **Machine Learning Foundation, Nasscom** **June 2023**
Assessment Certification from the Ministry of Electronics and Information Technology,
Government Of India
- **C Programming, Python Spoken Tutorial, IIT Bombay** **January 2023 , July 2023**
Participation Certificate

Languages

- **English**
- **Kannada**
- **Hindi**

Volunteering

- **Chair - IEEE Computer Society Chapter, Vemana IT** **January 2024 - Present**
As the Chair of the IEEE Computer Society Chapter, I led initiatives to foster a vibrant technical community within our institute. Responsibilities included organizing workshops, seminars, and hackathons, facilitating technical skill development among students, and promoting collaboration with industry professionals.
